Matrix Payment Systems

Dear :

We are writing to acknowledge excellence within your company. For the past two years, Bill Hoidas has been doing a fantastic job with our account. We have never been able to review our processing charges immediately. In addition, we have realized over thousands of dollars in annual processing charge fees. Every month he is in constant contact with me on our savings and how to further save money. He is also extremely diligent in keeping us informed of processing and industry information as it becomes available.

Bill Hoidas has gone above and beyond any service we have received in the past from any other processor. We feel his actions definitely merit recognition and feel that a person in your position, should be proud to have person like Bill Hoidas representing your company and its values with his kind and truly caring personality.

We applaud Bill and congratulate you and wish you and your company the best!

Sincerely,

Mark A. Montalbano
Vice President & CFO
